Company Profile

NOT COPY

3Consultancy services is a software company specializing in end to end product development. We understand your business needs, undertake design and development at the same time take care of strategy, implementation and maintenance. 3Consultancy service's 'Full Service Lifecycle' gives you significant advantage over a typical outsourcing relationship.

3Consultancy's 'Full Service Lifecycle' Approach

Our three staged service approach provide s a systematic framework right from planning stage till measuring product success.

Phase I Business Phase

Understanding what your business needs

Our very first step goes down to understand your business needs and identifying problems areas/potential opportunities. If you are a start up, we evaluate possibilities after a through evaluation of your business model.

- Business case study
- Competitor analysis
- Understanding target audience
- Developing product strategy and roadmap

Phase II Design & Development

Implementing Ideas through proven principles and best practices

Based on the product strategy and roadmap, product is documented in finer details. Our development approach ensures that resources stay focused, timelines are met and quality standards are precisely followed.

- Product Planning
- Resource allocation
- Design and development
- Frequent communication
- Constant mentoring and regular feedback
- Quality Assurance

During the course of product development, we consistently engage with you, keep you updated and receive your feedback on a regular basis. A dedicated project manager co-ordinate between the development team and business team to ensure that project stays on the right course.

Phase III Deployment & Ongoing Support

Its about being responsible for our job and taking on the next challenges

As soon as the product is ready, activities related to marketing, support and deployment begins. A comprehensive maintenance and support plan is worked out and future upgrades are planned based on market needs. We constantly correlate product development and maintenance with the end user/marketing environment and mould the product strategy accordingly.

- Implementation
- Marketing & Promotion
- User Feedback & Upgrades
- Product Strategy Review
- Maintenance & Support
